WORK AUTHORIZATION:

Permanent Resident (do not require sponsorship)

WORK EXPERIENCE:

Full Stack Developer | Ruby on Rails   **San Diego Startup Map, San Diego, CA**   **2023 - 2024**

- Used RVM to upgrade from Ruby version 2.6.10 to 2.7.8.
- Facilitated a transition from Sprocket to Webpacker for improved efficiency.
- Customized a Ruby gem for optimized data handling, resulting in a 15% improvement in table-related operations.
- Successfully migrated assets, culminating in a 25% decline in the project's asset-related issues.
- Managed the update process, leading to a 25% decrease in post-update bug reports.
- Deployed updates for 12 critical gems, addressing security concerns and introducing new features.

Teaching Assistant | HTML, CSS, JS   **LEARN ACADEMY, San Diego, CA**   **2023**

- Provided guidance and support to 10 students, new to the software development field, in HTML, CSS, and JavaScript projects, fostering their understanding and proficiency in these essential web development languages.
- Facilitated interactive learning experiences by breaking down complex concepts into digestible components, enabling students to grasp key principles and apply them effectively in their projects.
- Offered personalized assistance and feedback to each student, addressing individual learning needs and promoting continuous improvement and skill development in HTML, CSS, and JavaScript.

Full Stack Developer | MongoDB, Express, Node.js   Evealed Inc., San Francisco, CA   2020

- Enhanced EV-Trips website functionality in Node.js, MongoDB, Express, and React.
- Applied Test-Driven Development (TDD) principles, ensuring robust and reliable code in collaboration with the team.
- Actively participated in refining and optimizing the map functionality, contributing to the user-friendly and efficient navigation experience on the EV-Trips platform.
- Partnered with a team of 5 developers to achieve project milestones for EV-Trips.

Project Lead | Approval Process Automatization   Rosneftegaz Co., Noviy Urengoi, Russia   2017 – 2019

- Achieved +$100,000 monthly savings through monthly loss analysis of recorded information.
- Connected 15 distant petroleum operation centers and 32 gas stations to the office database, streamlining workflow.
- Strategically personally prevented 2 thefts through relocation of 20+ security camera on 12 petroleum sites.
- Innovatively averted product dissolution in oil tanks within 12 oil exploration stations, implementing new site information recording software.

Field Supervisor | Database Integration   Rosneftegaz Co., Noviy Urengoi, Russia   2014 – 2017

- Analyzed documentation, leading to promotions and personal advancement.
- Successfully promoted +10 team members, improving information analysis for more efficient issue resolution.
- Executed a database software at field facilities, detecting oil tank leakage and resulting in savings, equivalent to 50 tons of petroleum a month.
- Increased transparency by integrating remote sites record repositories with office, resulting in a 25% turnover increase.

Head Of Sales | Talent Supervisor and Automation Rosneftegaz Co., Noviy Urengoi, Russia   2011 – 2014

- Drove a 50% increase in revenue through strategic team management and thorough database evaluation across 5 operational locations.
- Fostered a positive work environment within 2 months, enhancing transparency and problem-solving between 3 departments.
- Recruited and on-boarded 5-10 team members, conducting exhaustive data assessment.
